Bridco Release New Stainless Steel Hardware Catalogue

Bridco have released our new stainless steel hardware 2010-2011 product catalogue.

The design concept of the catalogue has been to develop a simple yet informative guide to our products and services. We have created a straight forward contents page, listing our products in category's, which can also be found at the top left and right hand corner of each page. Each page is clearly numbered with the addition of Bridco's contact details along the bottom of each page.

The addition of full color is also a new concept for the Bridco stainless steel hardware catalogue, with our publications in the past being in black and white. The addition of color gives our catalogue a fresh appealing finish with an updated format. Our catalogues can be downloaded from our [links](#) page on this website alternatively hard copies are available on request.
