

## STAINLESS STEEL MODULAR HANDRAIL SYSTEMS

[www.bridco.com.au](http://www.bridco.com.au)

## COMPANY PROFILE

Bridco is the Registered trademark of Bridge & Company Pty Ltd, which is a family owned business first established in 1984. Bridco has since grown to become one of Australia's largest importers & exporters of quality stainless steel hardware.

Originally we were predominantly involved in the importation and wholesale supply of marine hardware, but the Company has expanded to become one of the largest suppliers of stainless steel wire rope fittings and hardware to the industrial and architectural industries. Bridco also specialise in a range of stainless steel Load Rated fittings and Grade 50, stainless steel chain & components.

Our staff comprises of personnel with extensive knowledge of the marine field, industrial lifting equipment and wire rope swaging.

Our products can be found in a wide and diverse range of industries including mining, fishing, logging, the armed forces, water & wastewater treatment plants, sewerage plants, petrochemical industries, architectural and structural engineering, playground equipment and shop fittings. Our products are widely sought after for both commercial and residential applications.

## PUBLICATION ERRORS

Although all care has been taken in the preparation and publication of this catalogue, the technical information including dimensions in illustrations, drawings and charts are non binding. Bridco does not accept any responsibility for any typographical or other errors which may have occurred during the production.

# STAINLESS STEEL FACTS

This catalogue contains a comprehensive range of quality stainless steel modular railing systems, suitable for both interior and exterior applications as well as commercial and residential projects.

**GRADES:** There are many grades of stainless steel, the majority of items in this catalogue are grade 316 with some products in grade 304 and zintec.

**ZINTEC:** Raw uncoated steel suitable for internal or external applications. These products need to be powder coated before application.

**GRADE 304:** Ideally suited to indoor use only, has good corrosion resistance and is one of the most commonly used grades of stainless steel.

**GRADE 316:** Has a higher level of corrosion resistance, therefore is most suitable to outdoor applications and for exposed coastal applications. The grade 316 is often referred to as "marine grade".

**Tea staining:** Tea staining can be defined as: discoloration of the surface of stainless steel that does not effect the structural integrity or the longevity of the material.

Contributing factors.....and what can be done about them.

The relationships between the contributing factors are complex, but generally become increasingly critical closer to marine water.

## **Environmental factors:**

Tea staining occurs most commonly within about 5 kilometers from the surf and becomes progressively worse closer to the marine source. However, wind exposure, pollution levels and high temperatures can create environments where tea staining might occur 20 kilometers or more from the sea water. These same factors also increase corrosion rates of alternative materials.

## **Surface finish:**

Rough surface finishes promote tea staining: The smoother the surface finish the better. A surface roughness (Ra) of less than 0.5 micrometers is strongly recommended, a No:4 finish is inadequate. Typically the products in this catalogue are 320 grit or higher which achieves a finish better than 0.5 micrometers (Ra).

## **Maintain regularly:**

Stainless steel is not maintenance free, but maintenance friendly. When using stainless steel material outdoors you need to clean periodically, especially in aggressive environments like coastal areas or swimming pools. Washing regularly will reduce the risk of tea staining. For best results wash with soap or a mild detergent and warm water, followed by rinsing with cold water. The appearance of the surface can be improved further if the washed surface is wiped dry.

We recommend Bridco B40 cleaner and B42 polish for the best maintenance results.

\* Material Data sheets are provided with B40 & B42.

## **Installation and inspection:**

After installation the completed structure should be washed and inspected for imperfections or contaminant's caused by the installation process. If discovered any imperfections should be cleaned off and polished with Bridco B40, followed by B42 polish. Hydrochloric acid should not be used on stainless steel as it will stain the surface and may start more serious corrosion.

The above notes have been researched by the Australian Stainless Steel Development Association (ASSDA) of which BRIDCO is a member.

Bridco will not be held responsible for any replacements at the time of publication. We recommend checking dimensions with our sales staff before purchasing Bridco products.

Bridco will not be held responsible for any errors, omissions or changes in dimensions at the time, or after publication of this catalogue.

## BRIDCO USER GUIDE & CONDITIONS OF USE FOR STAINLESS STEEL COMPONENTS.

Bridco have published a four page brochure containing important information for users of stainless steel components.

The user guide cover such issues as cleaning & maintenance, stainless steel grades, corrosion resistance & environmental factors.

Bridco recommend reading this guide before purchasing or selling stainless steel fittings and / or components.

To obtain a copy of the user guide please contact our sales department, alternatively a copy can be downloaded by visiting our website: [www.bridco.com/links.html](http://www.bridco.com/links.html)

The following tube fittings are for use with 50.8mm/2" tube.

## RAIL SUPPORT CAP - DOMED

## ULTRALOC RETAINING COMPOUND

Ultraloc is a high strength performance retaining compound for slip fitted parts. Ideal for gap filling up to 0.15mm.

For application surfaces should be dry, clean & free of any contamination. Adhesive should be applied to the part in sufficient quantity to fill the gaps.

| CODE       | TUBE               | WALL (mm) |

# HANDRAILS

## Maintenance.

Stainless steel is not maintenance free, but maintenance friendly. When using stainless steel material outdoors you need to clean periodically, especially in aggressive environments like coastal areas or swimming pools. Washing regularly will reduce the risk of tea staining. For best results wash with soap or a mild detergent and warm water, followed by rinsing with cold water. The appearance of the surface can be improved further if the washed surface is wiped dry.

We recommend Bridco B40 cleaner and B42 polish for the best maintenance results,(see page 29).

### For high salt or commercial applications G316 with a high or mirror polish should be used.

Satin finished products require extra maintenance especially in high salt environments. Rough surface finishes promote tea staining: The smoother the surface finish, the better. A surface roughness (Ra) of less than 0.5 micrometres is strongly recommended.

Further treatments such as passivating or electrolyzing will also promote better corrosion resistance.

Please note that modular hand rail fittings, open body turnbuckles etc , in their design, also require more regular maintenance due to gaps and crevices that trap foreign contaminants.

## Stainless Steel maintenance of external applications.

Rainfall on a regular basis will remove dirt, dust and other deposits from stainless steel if the design of the facade allows. In most parts of Australia however, there is often insufficient rainfall to effectively clean external fittings, Bridco therefore recommend the use of the cleaning schedule below.

## Stainless Steel Cleaning Schedule.

| Environment                        | Distance from beachfront or sheltered bay      | Cleaning interval |
|------------------------------------|--|-------------------|
| Mild                               | 15km+  | Every 12 months   |
| Moderate                           | 1 - 15km                                       | Every 4-6 months  |
| Marine/Industrial/Urban            | 500m - beachfront / 100m - 1km - sheltered bay | Every 3 months    |
| Sever Marine/Industrial/Busy Urban | 500m - beachfront / 100m - sheltered bay       | Weekly            |

## BRIDCO USER GUIDE & CONDITIONS OF USE FOR STAINLESS STEEL COMPONENTS.

Bridco have published a four page brochure containing important information for users of stainless steel components.

The user guide covers such issues as cleaning & maintenance, stainless steel grades, corrosion resistance & environmental factors.

Bridco recommend reading this guide before purchasing or selling stainless steel fittings and/or components.

To obtain a copy of the Bridco user guide please contact our sales department, alternatively a copy can be downloaded by visiting our website: [www.bridco.com.au/links.html](http://www.bridco.com.au/links.html)

## BRIDCO CLEANER

B40 stainless steel cleaner is a mixture of acids, selected solvents and surfactants specially designed to remove tea staining and grout from stainless steel stanchions, rails, stainless steel wire rope etc. B40 will not corrode stainless steel nor will it turn green or brown as hydrochloric based cleaners will.

\*A hazardous goods surcharge of +50% is applied to all freight costs for B40.

Standard box contains 6 x 500ml spray bottles (Hazardous Cargo). 20 litre containers also available.

## BRIDCO POLISH

B42 Stainless steel cleaner is specially designed to remove tea staining and fine scratches from stainless steel railings and fittings, etc.

B42 deposits a protective low surface energy, water resistant layer which repels water and air borne contaminants for several months before re-application may be required.

Standard box contains 15 x 250ml bottles.

\*Material Data sheets are provided with B40 & B42.

# GLASS CLAMP GASKETS

[www.bridco.com.au](http://www.bridco.com.au)

The glass clamps in this catalogue require rubber gaskets to ensure the glass can be secured safely.

The tables below are a guide to rubber gaskets, glass clamps & glass diameter.

| CODE         | FOR GLASS CLAMP           | GLASS DIA | PER CLAMP |

## DISPLAY UNITS

Bridco can design and assemble counter display and floor display units to suit your individual needs. Small units can be assembled prior to delivery and larger units partially assembled to allow for packaging and delivery. Final assembly would be required once unit was delivered.

## EXHIBITION PARTITIONS

Bridco stainless steel modular handrails are perfect when a barrier is needed for your exhibition show case.

Our staff can pre-cut and assemble your railing partitions to suit your individual show case requirements.

Your partition can be couriered to the venue of your choice ready for installation.

Our experienced staff will be happy to assist you with your partition needs.

TENSIONER - ALLEN KEY HEAD AISI 316

| CODE       | D1 | D2 | L1 | L2 | G  |
|------------|----|----|----|----|----|
| SS-7500-05 | 8  | 12 | 33 | 30 | M5 |

## GROMMETS

Bridco have a range of grommets to be used when passing wire through steel, aluminium or even timber posts. These UV stabilised, high density polythene grommets give a neat appearance as well as protection from chafe and electrolysis.

For further information on sizes and dimensions please refer to the Bridco product catalogue or visit our website [www.bridco.com.au](http://www.bridco.com.au) and follow the link to download the catalogue.
